# BigCommerce

## You focus on building your store, let us take care of streamlined customer experience

miniOrange provides a ready-to-deploy cloud-based customer identity and access management (CIAM) solution that can be quickly set up & integrate with your company's existing systems. Save time and resources compared to building and maintaining a similar solution in-house, and reduce engineering costs by up to 95%.

miniOrange

## *Verified* Technology Partner of BigCommerce

SSO + MFA Support for any BigCommerce Plan (Standard, Plus, Pro, Enterprise)

### CIAM Support

miniOrange CIAM solution for BigCommerce Store would allow merchants to manage the identities & access privileges of their customers in a secure and centralized manner. This includes features such as login and registration, password management, multifactor authentication, and permissions for accessing certain areas of the merchant's store/ website or applications.

### Single Sign-On

SSO allows customers to access their BigCommerce stores account using a set of login credentials that they have established with a third-party service. This can be convenient for customers, as they do not need to create and manage separate login information for each website or application they use.

### Social login

miniOrange Social Login SSO solution allows your customers to log into your online store using their existing social media accounts, such as Facebook, Google, Apple & many more. This can make it easier to streamline the login process for users who need to access multiple accounts or services.

### Multi-Factor Authentication

MFA can be used to add an extra layer of security to your BigCommerce store by requiring additional authentication while logging in to the store's admin panel or making changes to sensitive information.
OTP over SMS/ email, authenticator apps and 15+ more authentication methods to choose from miniOrange MFA solution.

### Sync Feature

miniOrange allows you to connect your multiple BigCommerce stores (or) Store to CRM system & synchronize your customer data between the two platforms. This helps businesses to automate their customer data management processes within the CRM system & keep multiple stores in sync.

### Order Status Notification

miniOrange Notification app allows merchants to send customized email and SMS notifications to customers based on certain triggers, such as abandoned cart reminders or order confirmation messages.
The app can typically be easily configured with BigCommerce App.
