Product Datasheet

Oracle SSO

miniOrange

Oracle Single Sign-On (SSO), is an integration that provides an easy, secure and seamless access to all Oracle enterprise applications.

miniOrange provides Oracle SSO Solution for all oracle applications like Oracle EBS, Siebel, Peolesoft, JD Edwards, etc without the need to purchase and install Oracle Access Manager (OAM) and Oracle Internet Directory (OID) licenses.

Product Features

OAM and OID not required

Oracle Access Manager - OAM and Oracle Internet Directory - OID Licenses are not mandatory to integrate SSO between Azure, Identity Provider and any of the Oracle Applications

Multi-Factor Authentication (MFA)

Add an extra layer of MFA security to your Oracle applications while logging in. It ensures the right set of eyes has access to your sensitive information sitting on the cloud or on-premise. We support 15+ MFA methods .

Directory Integration

Easily Integrate your existing LDAP/Active Directory or any SQL database in miniOrange to provide users SSO login with secure access to Oracle applications using their existing credentials.

User Provisioning

User Provisioning helps users update information in your integrated directory IDP and Oracle Apps when you manage user information like **CREATE, DELETE or UPDATE** user accounts in miniOrange.

IP and Device Based Restriction

Admin can limit their users to Oracle login from specific IPs and devices. These Adaptive Authentication factors provide additional security to your Oracle Applications SSO login.
Authenticate with External IdPs

Authenticate with External IdPs

Use your existing SAML 2.0 or OAuth Identity Provider (IDP) to authenticate into Oracle applications. No need to onboard your users separately, we provide uninterrupted single click access to users.

Use Cases

Enabling SSO & MFA into a purely On-Premise Legacy application

Enabling SSO & MFA into a purely On-Premise Legacy application which does not support any standard protocol. This application is Oracle E-Business Suite, and we are also figuring out a solution for Oracle PeopleSoft, JD Edwards, Siebel CRM.

Direct Authentication

We are also enabling customers to directly authenticate against the FND_USER table of the Oracle DB to allow for a seamless authentication flow. We are doing all of this while also using the least amount of components.

Fastest Deployment

We boast the fastest possible deployment time amongst all the competitor solutions.
