Product Datasheet

Password Management

Password Manager provides a simple, secure, self-service solution that allow send users to reset forgotten passwords and unlock their accounts. It permits administrators to implement stronger password policies while reducing the helpdesk workload. Organizations no longer have to sacrifice security to reduce costs.

miniorange

Features

Special Characters :
Encourage users to use special characters for strong authentication at the time of password reset.

Password Expiration Notification :
Remind users of their upcoming password expiration date via email, SMS, and push notifications.

Policy for a strong password :
Enforce fine-grained password policies for your directory that includes a password dictionary filter, a pattern checker, and more.

Easily change password :
Allow users to reset and change their domain passwords easily in their present directories on their own.

Recover Password/ Username :
Users can recover their passwords by answering challenge questions configured by an administrator.

Lowers IT costs :
Reduced support calls for self password resets, proper user lifecycle management , and the elimination to store various records in various directories and environments all contribute to a reduction in the organization's overall security management cost.
