MADE IN INDIA · TRUSTED BY THE WORLD

Data Privacy & Protection Suite

Suite Overview

miniOrange's Data Privacy & Protection Suite provides a unified approach to enterprise data security and regulatory compliance. It combines automated data discovery and classification, data loss prevention, DPDP Act 2023 compliance automation, and fully managed privacy-as-a-service within a single solution.

Whether your focus is identifying sensitive data across endpoints and cloud systems, preventing data leakage through email and removable media, meeting DPDP obligations, or outsourcing privacy operations to experienced advisors and legal experts, the suite supports all four areas through purpose-built modules,
India-native architecture, and 6,000+ pre-built integrations.

Data discovery and Classification

Find & classify sensitive data across databases, cloud, endpoints & SaaS apps

Data Privacy Platform

Automate DPDP consent, RoPA, DPIA, breach & Data Principal rights

Data Loss Prevention (DLP)

Prevent data leakage via endpoint, email, cloud & web channels

Privacy as a Service

Managed DPO, legal retainer, gap assessment & data breach insurance

Data Discovery & Classification

Data Discovery Engine

Structured & SaaS Sources

- Relational databases: Oracle, SQL Server, MySQL, PostgreSQL, MariaDB, SAP HANA, Teradata, Sybase ASE, Informix, SQLite
- Cloud databases: Amazon RDS, Aurora, Google Cloud SQL, Azure SQL, Snowflake, BigQuery, Redshift, Azure Synapse, Vertica, Greenplum, Hive
- NoSQL: MongoDB, Cassandra, Couchbase, Redis
- SaaS: Microsoft 365, Google Workspace, Salesforce, ServiceNow, Workday, Oracle Fusion Cloud, Slack, Zoom, Dropbox, Jira, Confluence, Zendesk, HubSpot, DocuSign, Okta, OneDrive, SharePoint Online, GitHub, Shopify, Zoho CRM, Notion, Asana, Trello, Freshdesk and more

Unstructured, Cloud & Endpoint Sources

- File shares: NAS, SMB shares, NFS, network drives, departmental shares, home directories, shared storage repositories
- Cloud storage: Amazon S3, Azure Blob Storage, Google Cloud Storage, SharePoint
- Cloud providers: AWS, Microsoft Azure, Google Cloud Platform, multi-cloud & hybrid environments
- Endpoints: Windows, Linux, macOS

Classification Engine & Data Principal Mapping

- Identify PII, Sensitive Personal Data (SPD), PCI-DSS, financial & regulated data using policy-based classification
- Map discovered records to individual Data Principal identifiers
- Centralized policy-driven classification across structured & unstructured sources
- Improve visibility into whose data is stored where and in what context
- Accelerate DSAR, consent, retention & breach response workflows

OCR Scanning & Risk-Based Activity Monitoring

- OCR scanning extends discovery into PDFs, scanned images & ID proofs
- Covers email bodies, attachments, Word docs, Excel spreadsheets & cloud file sources
- Risk-based prioritization of data exposure by sensitivity, volume & repository context
- Helps security teams focus on high-risk stores, reduce noise, and act faster
- Make discovered data searchable, attributable &audit-ready for compliance

Data Privacy Platform

Consent & Cookie Management

- Customizable consent capture forms & layered notice banners
- Granular preference centre with purpose-level control
- Cookie banner with automated tracker categorization & disclosure
- Consent withdrawal with automated termination of processing
- Tamper-proof SHA-256 consent artefacts with full version history
- 22 Indian languages + global language support
- Offline Consent collection support via OCR

Record of Processing Activities (RoPA)

- Guided RoPA builder with DPDP-aligned templates
- Centralized processing register with role-based access
- AI-assisted auto-updates from data discovery scans
- Retention schedule management & automated deletion triggers
- Cross-border transfer restriction tracking & safeguard documentation
- Export-ready regulator reports for DPB submissions

DPIA Module

- Guided Data Protection Impact Assessment (DPIA) workflow
- AI-assisted risk scoring with intelligent recommendations
- Approval & review workflows with stakeholder sign-off
- Pre-built templates for Significant Data Fiduciaries
- Residual risk tracking & remediation task assignment
- Linked to RoPA & Vendor records for a unified risk register

Incident & Breach Management

- Structured breach intake, triage & classification
- Automated severity scoring with escalation routing
- Internal escalation workflows & task assignment
- Automated DPB & Data Principal notification (72-hr SLA)
- Evidence & documentation repository with chain-of-custody log
- Post-incident review, closure records & repeat-risk tracking

Data Principal Rights Portal

- Self-service portal for Data Principals in 22 Indian languages
- Access, correction & erasure request submission & tracking
- Right to Nominate — delegate rights on death or incapacity
- Grievance submission, tracking & resolution workflows
- Configurable SLA management with automated reminders
- Tamper-proof audit trail for every request lifecycle

Vendor / Processor Management

- Centralized Data Processor register & onboarding workflows
- Data Processing Agreement (DPA) tracking & version control
- AI-assisted vendor risk scoring & classification
- Periodic review & re-assessment workflows with alerts
- Third-party questionnaire management & response tracking
- Contract expiry alerts & renewal reminders

Role-Based Portals — All Bundled, No Add-On Fees

- Admin Portal
- Data Fiduciary Owner
- DPO Portal
- Grievance Officer
- Data Processor
- Data Principal

API & SDK Access: Embed Privacy Anywhere

All platform capabilities, including consent management, rights fulfillment, breach notifications, RoPA, and portal interfaces, are accessible through REST APIs and SDKs. This enables seamless integration of miniOrange's privacy infrastructure into existing tools, products, and workflows without disrupting current systems or processes.

- Embed consent portal in your product or app
- Connect to your CRM, HRMS or ERP
- Push rights requests into your ticketing system
- Trigger breach workflows via webhooks
- White-label the Data Principal portal
- Pull compliance data into custom dashboards

Data Loss Prevention (DLP)

Endpoint DLP

- Block unauthorized transfers via USB, external drives & printers
- Restrict copy/paste, screen capture & local/ remote file transfers on sensitive data
- Prevent uploads to personal email & unapproved sharing platforms
- Enforce context-aware policies by user, device, content & destination
- Allow temporary policy exceptions via admin approval workflow
- Maintain detailed transfer logs for audits & incident response

Email DLP

- Scan outbound email content, attachments & recipient domains before delivery
- Detect PII, financial records & confidential business data in messages
- Enforce block, quarantine, encrypt or redact actions based on policy
- Restrict emails to unauthorized external or personal email domains
- Support Gmail and Outlook mail environments
- Classify, whitelist or quarantine messages before delivery

Cloud & SaaS DLP

- Control data sharing across Microsoft 365, Google Workspace, Salesforce & Slack
- Monitor file uploads, downloads & permission changes in real time
- Detect & prevent unauthorized external sharing & public link exposure
- Identify sensitive data stored in cloud drives & collaboration workspaces
- Trigger block, alert, quarantine or access revocation on policy violations

Application & Network Control

- Block risky websites, categories & unapproved web destinations
- Restrict application access to approved locations & time windows
- Remotely install or uninstall applications from the admin console
- Apply content filtering to reduce web & application data exposure
- Evidence & documentation repository with chain-of-custody log
- Allow users to raise access requests with admin-gated approval workflows

Data Masking & Encryption

- Dynamic & static data masking for databases & business reports
- Tokenization of sensitive data for secure cross-team usage
- Encryption of data at rest & in transit
- Centralized encryption key management across environments
- Scan files by type & content rules before upload or transfer
- Reduce regulated data exposure while enabling secure collaboration

Monitoring, Reporting & Access Control

- Track endpoint, email, cloud & peripheral activity in a unified dashboard
- Detect unusual transfer patterns & risky user behaviour in real time
- Trigger instant alerts on policy violations or suspicious events
- Maintain tamper-proof audit trails for security reviews & investigations
- Define role-based dashboard access by job function
- Customize privileges for editing, deletion & module-level controls

Core Capabilities of Data Loss Prevention

Protect Sensitive and PII Data

Identify and protect personally identifiable and sensitive business data across endpoints, cloud platforms, and email using discovery, classification, and policy-driven protection controls.

Detect and Prevent Insider Data Risks

Monitor user activities and detect risky behavior to prevent accidental or intentional data leaks by employees, contractors, or privileged internal users.

Secure Third-Party Data Access

Control and monitor how third-party vendors access sensitive information, ensuring external users follow security policies and reducing risks from vendor ecosystems.

Support Compliance Requirements

Apply data protection policies, maintain audit logs, and enforce controls to help organizations align with privacy regulations and industry compliance requirements.

Privacy as a Service

01 → Gap Assessment
End-to-end DPDP gap analysis across policies, data flows & controls

02 → Roadmap and Setup
Prioritized remediation plan; compliance dashboard configured

03 → Ongoing DPO Services
Qualified DPO on retainer; rights management, training & policy work

04 → Legal Retainer
Dedicated privacy counsel; contract drafting & regulatory filings

05 Insurance Cover
Breach liability, complaint cover & business interruption protection

Gap Assessment & Remediation

- End-to-end gap analysis against DPDP Act & Rules 2025
- Data flow mapping across all processing activities
- Consent mechanism review & vendor contract coverage review
- Executive gap report with risk-rated findings & penalty exposure heatmap
- Phased remediation roadmap: 0–30 / 30–90 / 90+ days with RACI ownership
- Live compliance dashboard with real-time posture scoring & module status

Roadmap & Setup

- End-to-end gap analysis against DPDP Act & Rules 2025
- Data flow mapping across all processing activities
- Consent mechanism review & vendor contract coverage review
- Executive gap report with risk-rated findings & penalty exposure heatmap
- Control gap identification across people, processes & technology
- Board-ready findings presentation with prioritised action areas

DPO & Advisory Services

- Continuous compliance monitoring & regulatory liaison with DPBI
- DPIA oversight, risk sign-off & breach notification management (72-hr SLA)
- Data Principal rights management (access, correction, erasure, grievance)
- Role-specific privacy training: all-staff, HR, IT, Marketing & Legal
- Policy drafting: Privacy Notice, DPAs, Incident Response & Data Governance Policy
- Monthly compliance reports & quarterly board privacy updates

Privacy Legal Services

- Privacy legal retainer with monthly advisory hours included
- Unlimited DPA & contract drafting — no volume cap
- Cross-border transfer legal assessment & SDF classification advice
- Joint Controller, sub-processor & SaaS data sharing agreements
- Regulatory filings, responses to DPB notices & audit facilitation
- Data Principal complaint & litigation risk advisory support

Data Privacy Insurance

- Data breach liability: notification costs, forensics & legal defence
- Regulatory fines & penalties coverage
- Data Principal complaint & crisis management costs
- Revenue loss & operational disruption compensation
- Ransomware event coverage
- Policy facilitated via approved insurer — subject to risk assessment

Cost of Non-Compliance

VIOLATION TYPE	Max Penalty	Risk Level
Failure to Implement Security Safeguards	₹250 Cr	CRITICAL
Failure to Notify Data Breaches	₹200 Cr	CRITICAL
Violations in Children's Data Handling	₹200 Cr	CRITICAL
Non-Compliance with SDF Obligations	₹150 Cr	HIGH
Failure to Fulfill Data Principal Rights	₹50 Cr	HIGH
Consent Notice and Grievance Failures	₹50 Cr	MEDIUM

Built for Every Industry

Healthcare

Protect patient records & diagnostics; meet DPDP obligations across hospital systems and endpoints

BFSI

Secure customer & payment data; support RBI guidelines & SEBI CSCRF requirements

Education

Prevent accidental or insider-driven sharing of student, staff & academic personal data

Manufacturing

Protect patient records & diagnostics; meet DPDP obligations across hospital systems and endpoints

Government & PSUs

On-premise & private cloud deployment for data residency full DPDP Act compliance for public sector fiduciaries

IT & SaaS Companies

Block source code leakage, monitor sensitive project data, and automate DPDP consent & rights management for digital

Integrations & Deployment

6,000+

Pre-built integrations

HRMS | CRM | Cloud Storage | ITSM & Ticketing | SSO / SAML / SCIM | REST APIs | Databases & SaaS Apps

Cloud SaaS

India-hosted, multi-tenant SaaS with zero infrastructure overhead

On-Premise

Deploy within your own data centre — ideal for Government & BFSI

Private Cloud

Dedicated isolated instance for Significant Data Fiduciaries

One Suite. Complete Coverage.
