Accolades

Recognized as

"Strong Performer"

In Gartner VOTC 2025

SPRING 2025 G2
Momentum Leader

Rapidly improving product, gaining popularity through exceptional user experiences.

SPRING 2025 G2
High Performer

Excels in quality, usability, and support, delivering outstanding performance.

SPRING 2025 G2
Easiest To Use

Highly recommended by customers, showcasing exceptional satisfaction and trust.

SPRING 2025 G2
Best Meets Requirements

Tailored to user needs, effectively addressing core functionality expectations.

miniOrange Suite of Products

Identity and Access Management (IAM)

For your employees and customers to seamlessly access and securely authenticate to any applications.

Single Sign-On (SSO)
Employee

Multi-Factor Authentication (MFA)
Employee

User Lifecycle Management (ULM)
Employee

Adaptive/Risk Based Authentication
Employee

Passwordless Login
Employee

User Profile & Onboarding
Customer

Privileged Access Management (PAM)

PAM secures critical accounts, enforces least privilege, controls access, and ensures compliance.

Mobile Device Management (MDM)

Manage workforce devices remotely with security policies, app control, and instant wipes.

Data Loss Prevention (DLP)

Prevent data leaks by controlling transfers from endpoints and cloud apps using robust DLP solution.

Identity Governance & Administration (IGA)*

Centrally govern user access across apps & manage entitlements, review requests, SoD, provisioning, & more.

Security Solutions for **Marketplaces**

WordPress

Secure your WordPress site with our comprehensive suite of advanced security solutions. Additionally, improve user management, simplify operations, and protect your digital ecosystem with efficient integrations and powerful tools.

Atlassian

We deliver a complete suite of solutions to secure your Atlassian ecosystem. From authentication to user provisioning, our apps protect data, streamline workflows, and integrate seamlessly to deliver enterprise-grade performance.

Shopify

Protect and optimize your E-Commerce store with miniOrange – offering advanced security, automation, provisioning, and loyalty solutions for B2B, B2C, and DTC merchants, ensuring seamless store management.

Drupal

miniOrange empowers Drupal sites with seamless IAM (Identity and Access Management Solutions), offering robust security, Single Sign-On (SSO), Multi-Factor Authentication (MFA), and user provisioning for enhanced efficiency and protection.

Joomla

Discover how miniOrange empowers Joomla teams with seamless identity and access management solutions, delivering robust security, single sign-on (SSO), multi-factor authentication (MFA), and user provisioning.

DNN | Moodle | Jenkins | Sonarqube | October | Hubspot

Identity & Access Management (IAM)

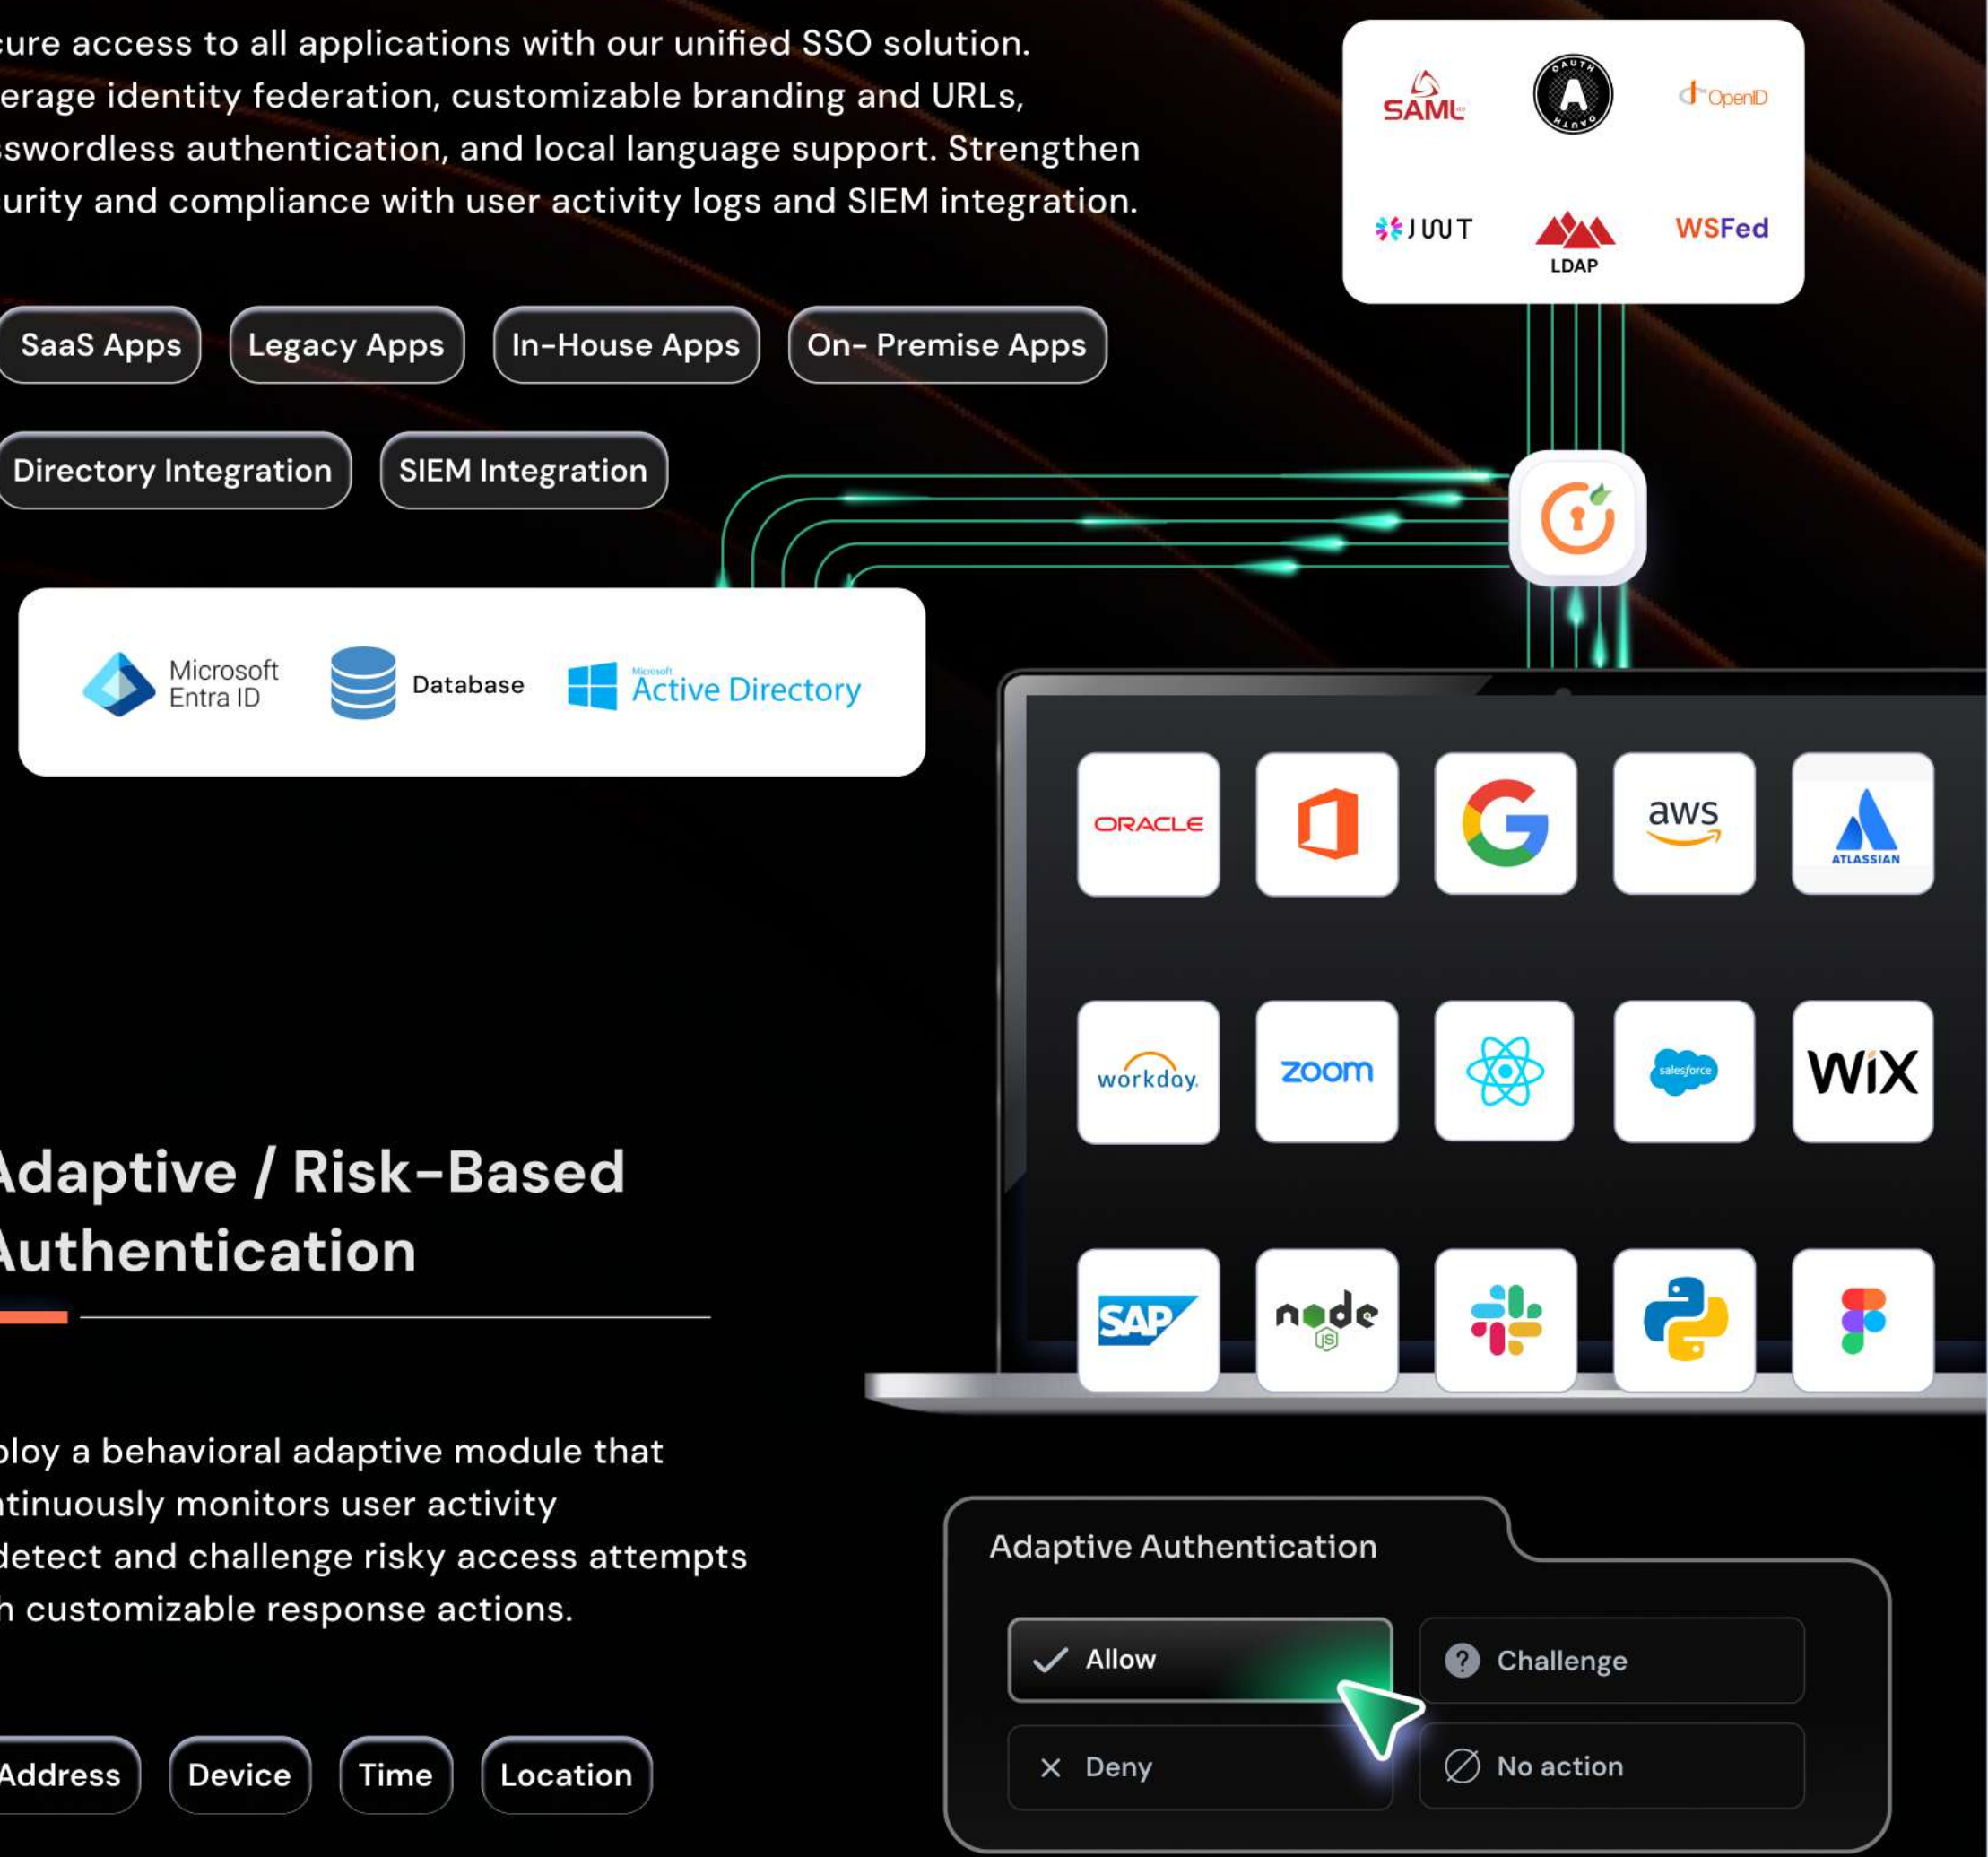
For Employees | For Customers

Single Sign-On (SSO)

Secure access to all applications with our unified SSO solution. Leverage identity federation, customizable branding and URLs, passwordless authentication, and local language support. Strengthen security and compliance with user activity logs and SIEM integration.

SaaS Apps | Legacy Apps | In-House Apps | On- Premise Apps

Directory Integration | SIEM Integration



Adaptive / Risk-Based Authentication

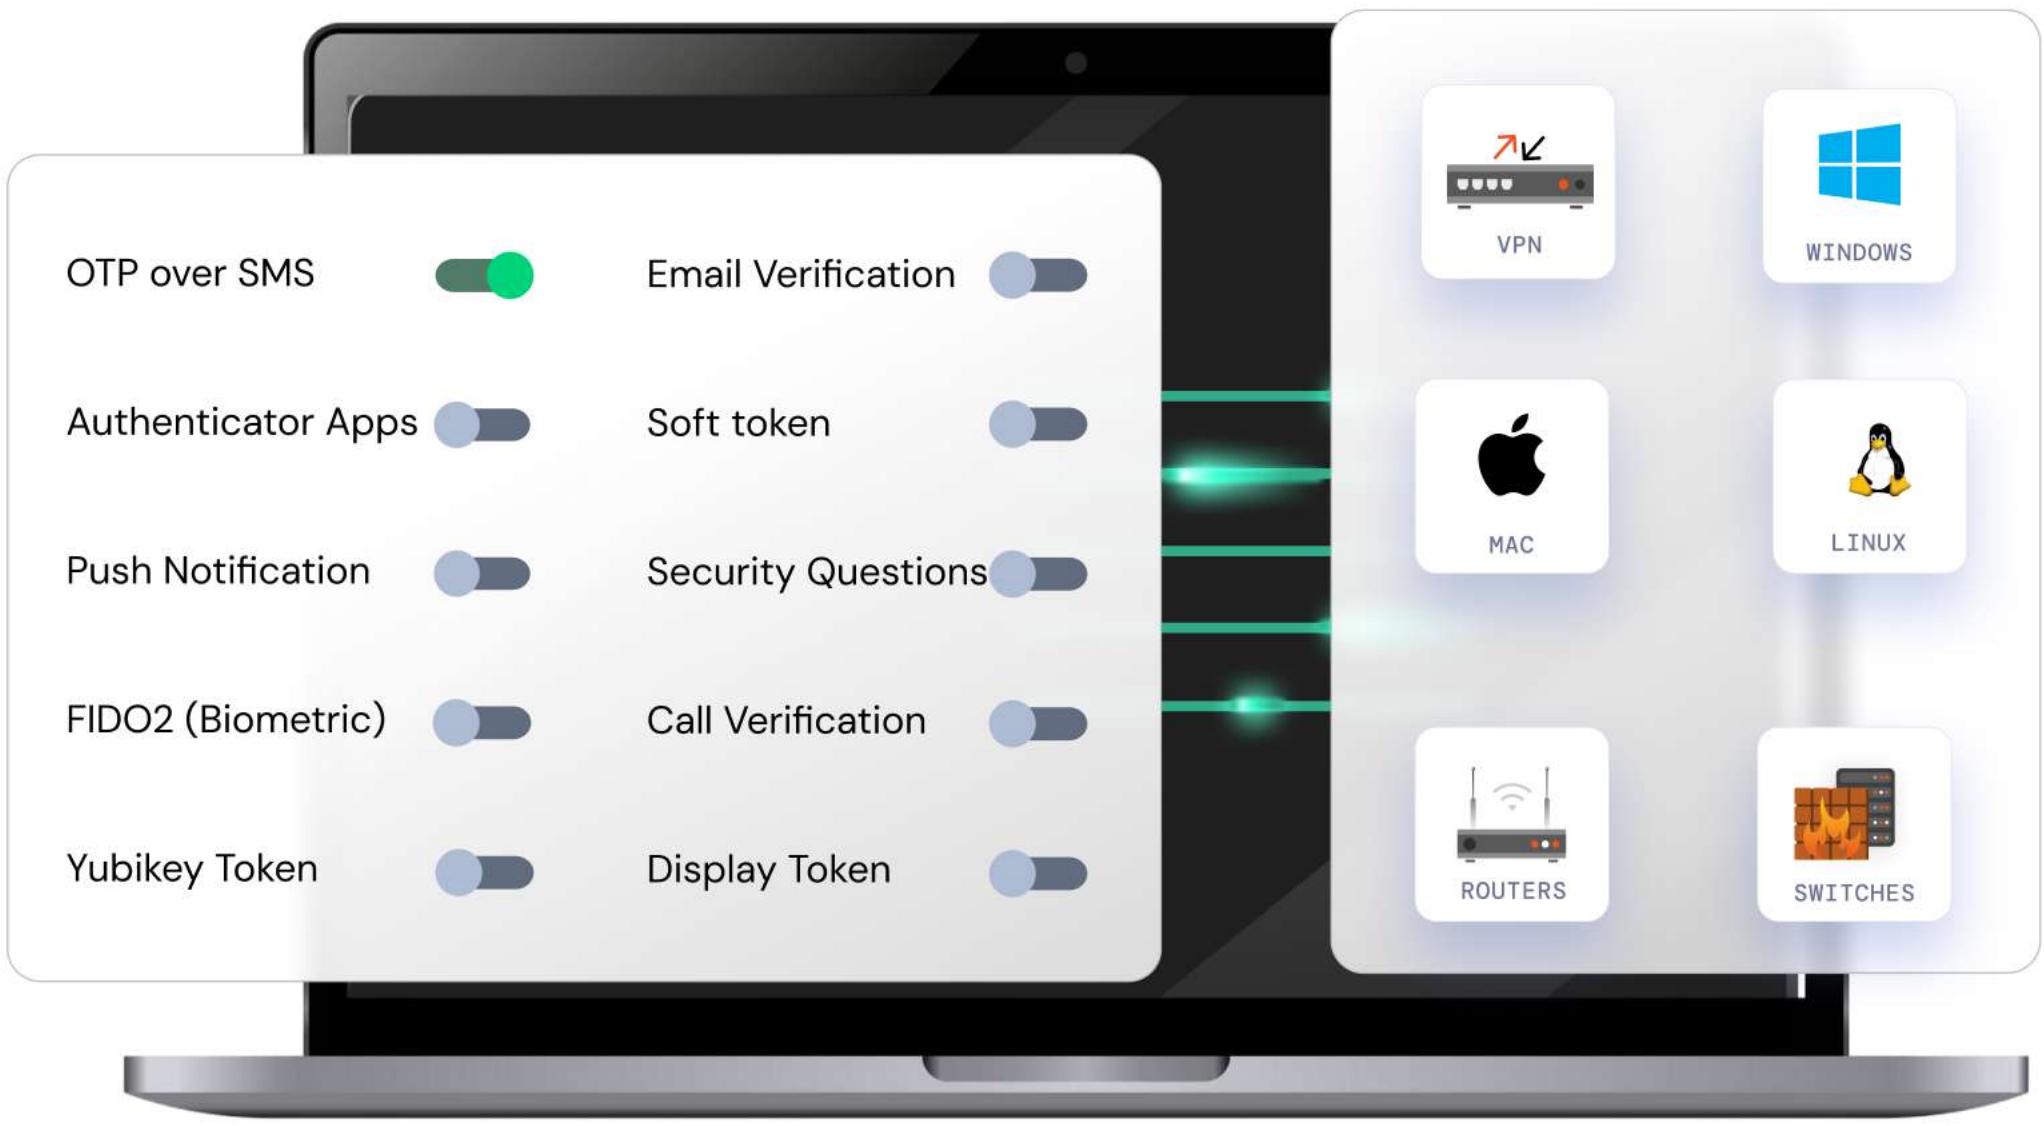
Deploy a behavioral adaptive module that continuously monitors user activity to detect and challenge risky access attempts with customizable response actions.

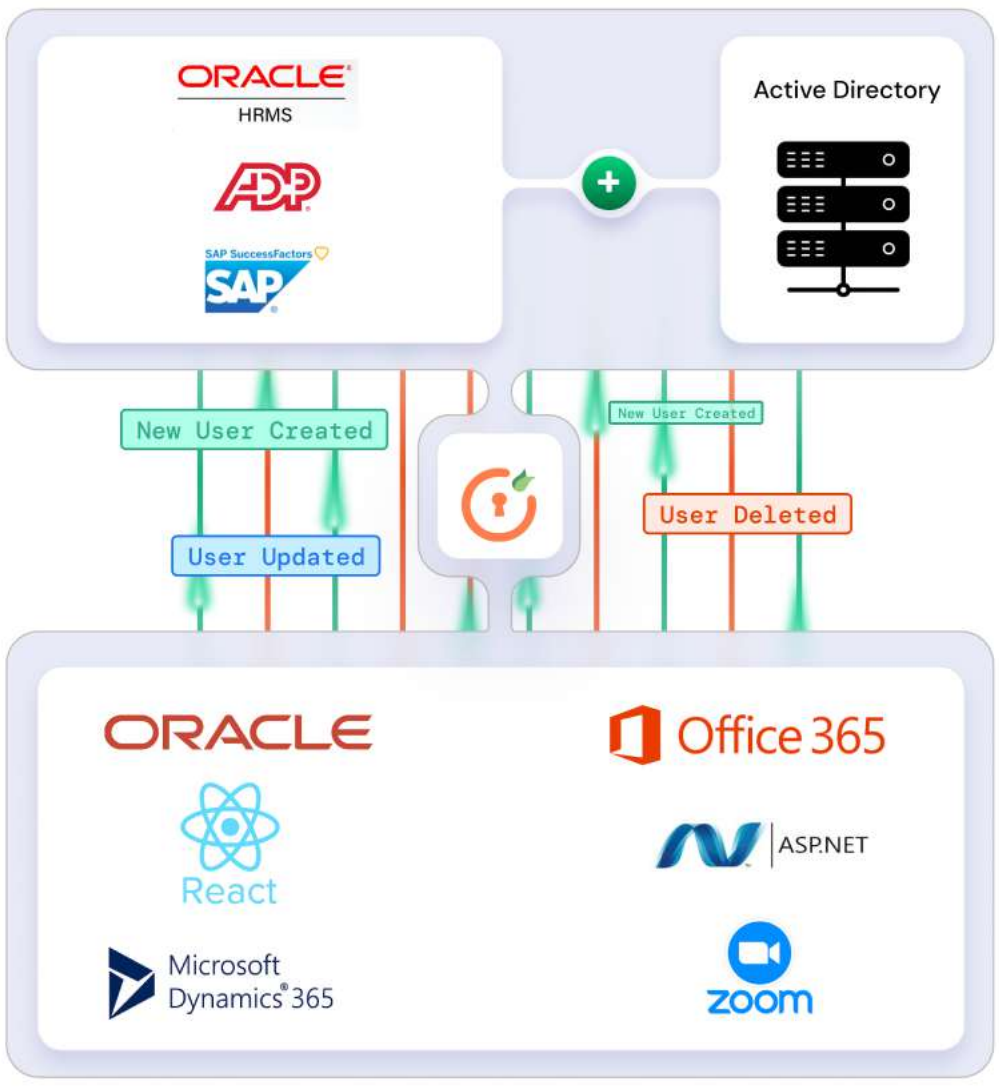
IP Address | Device | Time | Location

Multi - Factor Authentication (MFA)

Enhance your security with additional layer of protection
Supports 15+ authentication methods such as OTP, Push notifications, Authenticator apps, Biometrics & FIDO 2 Keys

VPNs | Windows | Linux | Mac | Network Device | Radius & TACACS





User Lifecycle Management

Automate employee onboarding, offboarding, and user management tasks—including joiners, movers, and leavers—to reduce manual effort. Define automated workflows for provisioning, deprovisioning, and access control, with custom rules for role-based access, approvals, and time-based account actions.

SCIM | Workflow Automation | HR Driven

API & Webhook

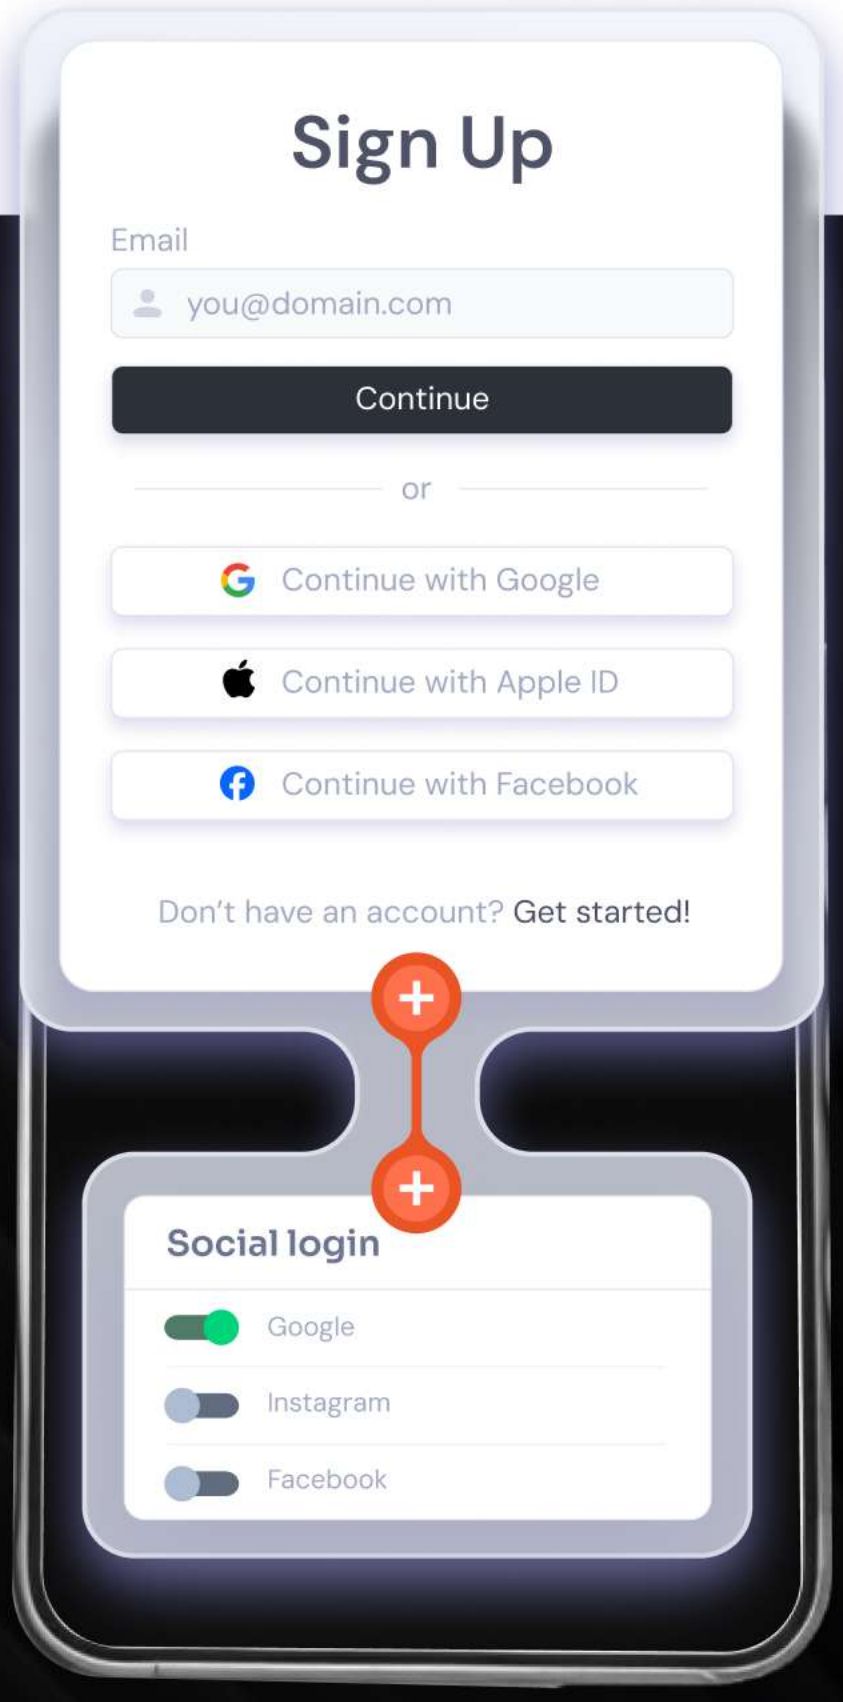
Identity & Access Management (IAM)

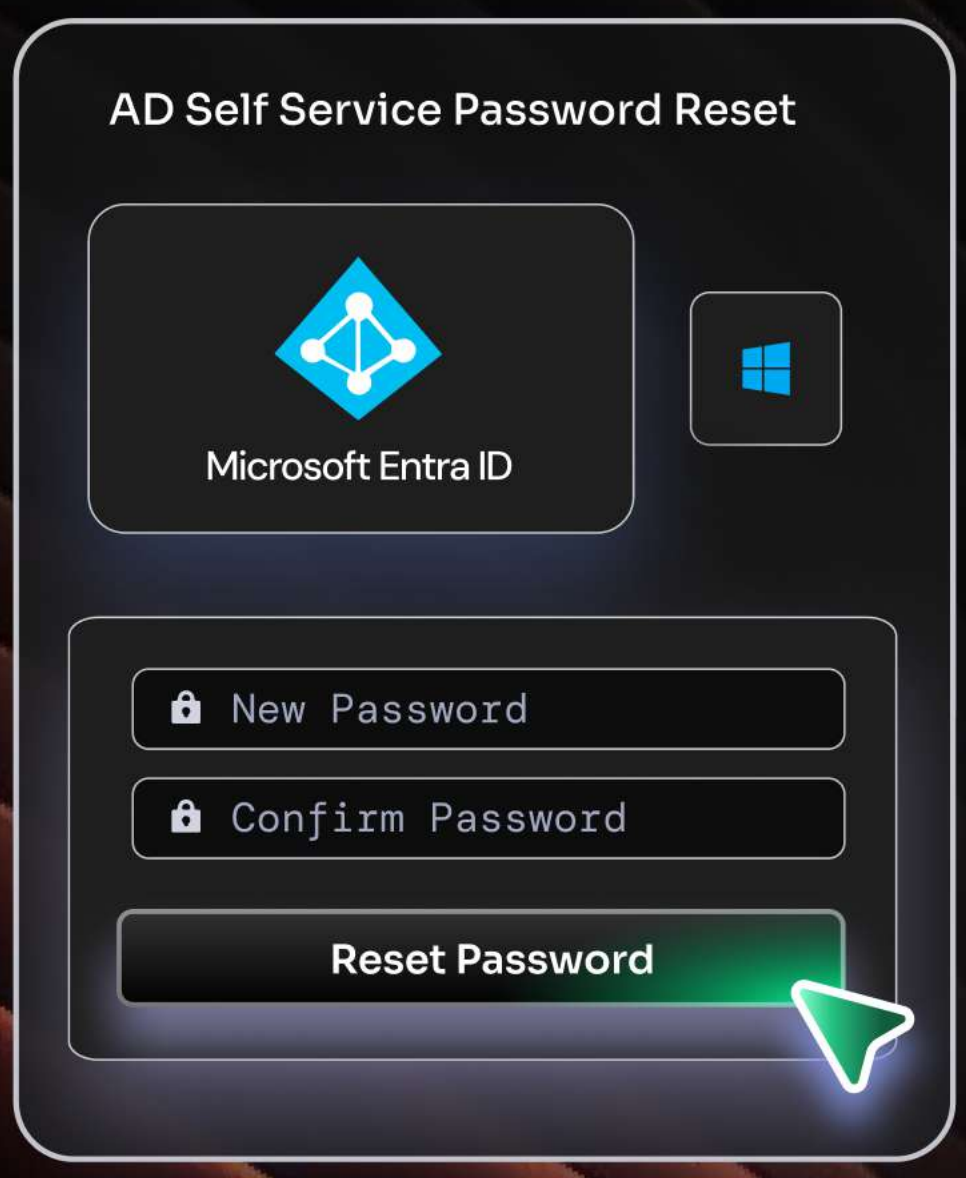
For Employees | For Customers

Passwordless Login

No more password management hassles and vulnerabilities, deliver a seamless user login experience.

Biometric | FIDO | Push Notification





AD Management

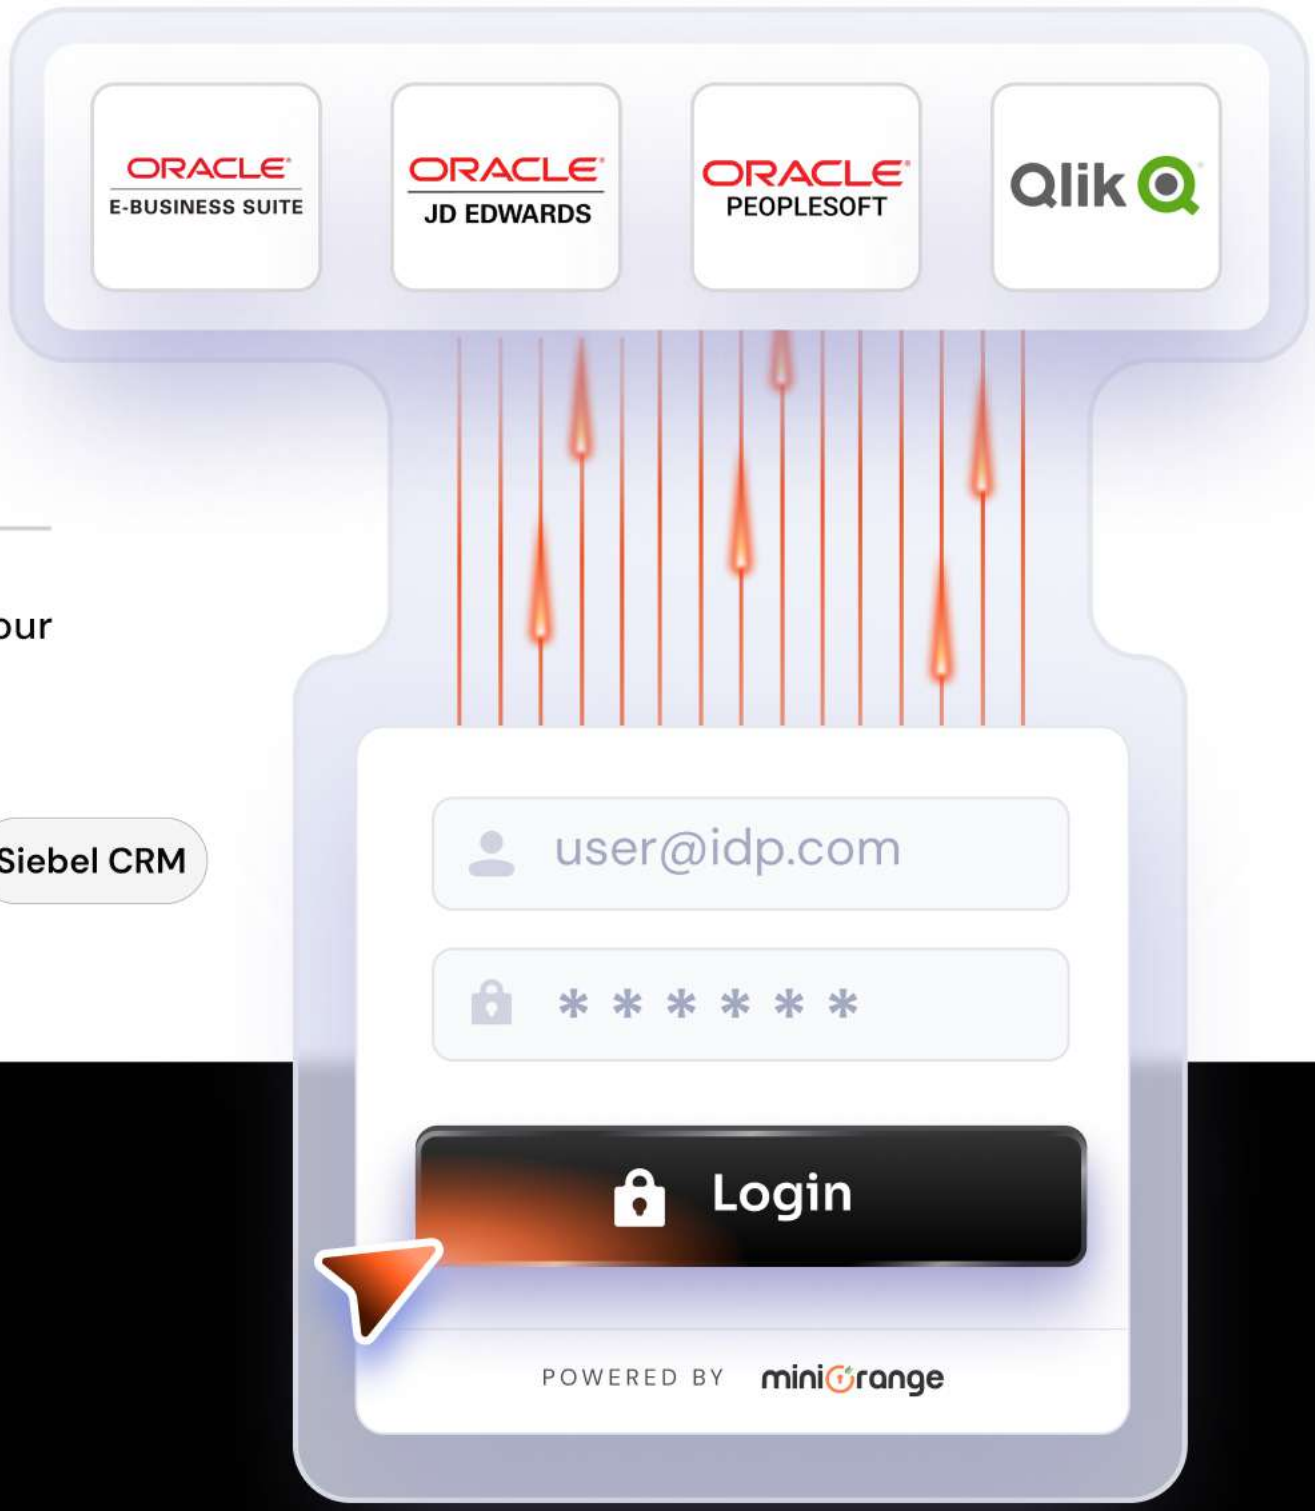
Extend identity federation to Active Directory and enforce robust password policies across all systems,empowering users through self-service password management.

SSPR | User & Group Management

SSO for Legacy Apps

Extend modern authentication for users in your legacy or on-prem applications without modifying source code.

Oracle EBS | JD Edwards | PeopleSoft | Siebel CRM



Identity Governance & Administration

Strengthen Your Security Posture By Centrally Governing User Access Across All Applications And Systems. Implement Robust Access Controls With Entitlement Management, Access Reviews, Access Request Management, Separation Of Duties (SoD), And Automated Provisioning.

Access Certification | Role-based Access Control (RBAC) | **Orphan Account Detection**

Multi-level Reviewers | **Entitlement Catalogue** | User Provisioning and De-provisioning

Compliance Reporting

miniOrange

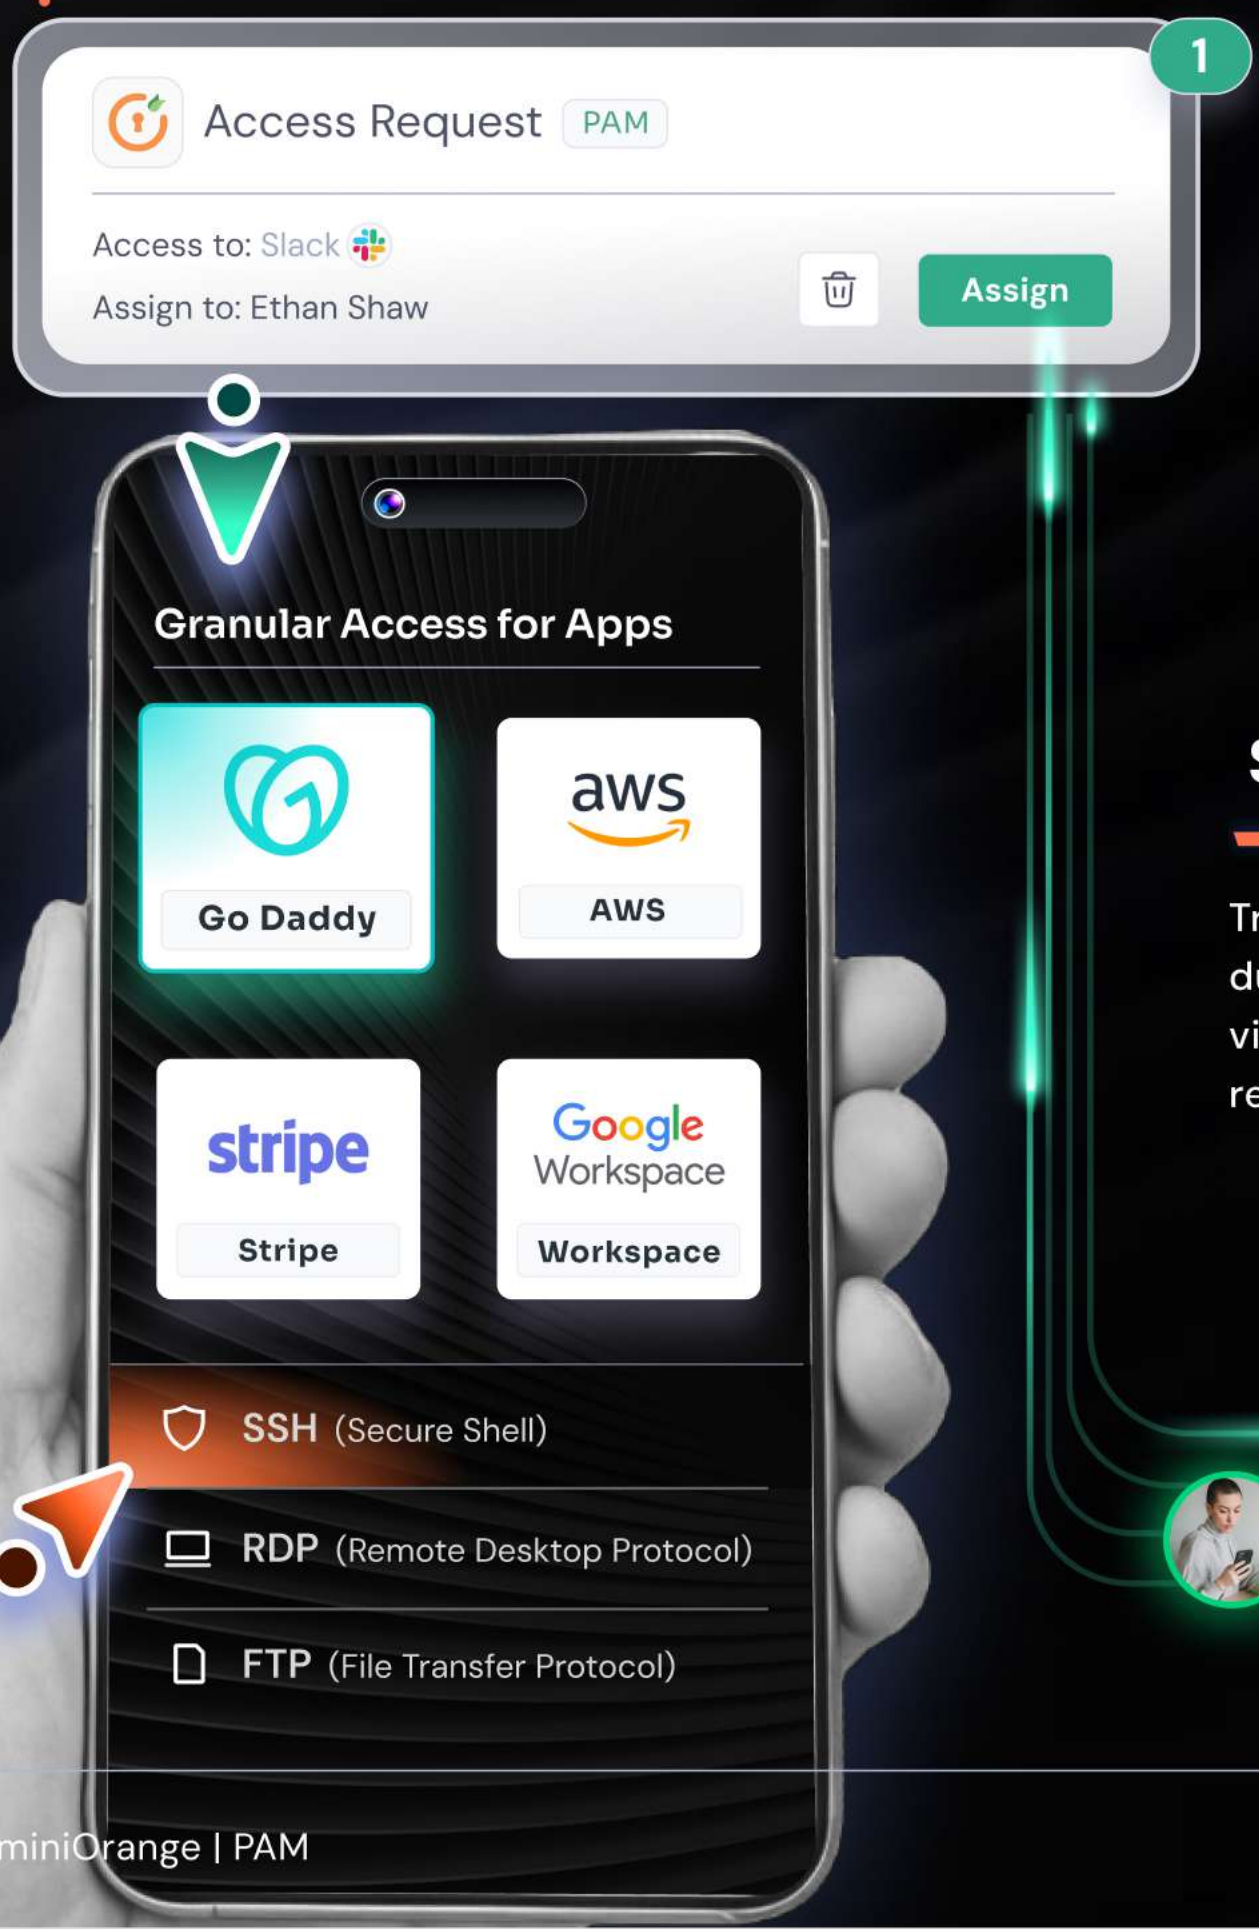
Privileged Access Management (PAM)

Privileged Access Management (PAM) safeguards sensitive accounts by managing and monitoring access to critical systems. It enforces the least privilege, secures credentials, controls sessions, and ensures compliance. PAM reduces insider threats and protects against external attacks.

RDP & SSH | Databases | FTP & SFTP | VDI & VNCs | Web & Desktop Apps | OT & Telecom Devices

Privilege Elevation & Delegation

Grant just-in-time elevated access for specific tasks. Delegate privileges without compromising control or system integrity.

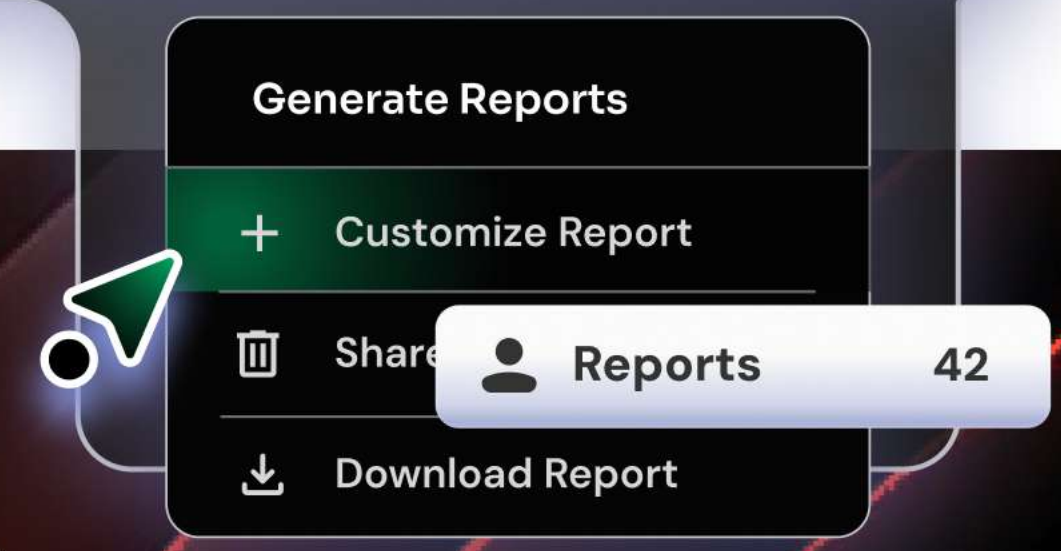


Granular Access Control

Define precise access permissions for users and groups. Minimizes risk by enforcing the privilege of least privileges across your environment.

Session Monitoring & Control

Track privileged sessions in real-time, intervene during suspicious activities, and maintain full visibility to protect critical systems through recorded sessions.



Auditing & Reporting

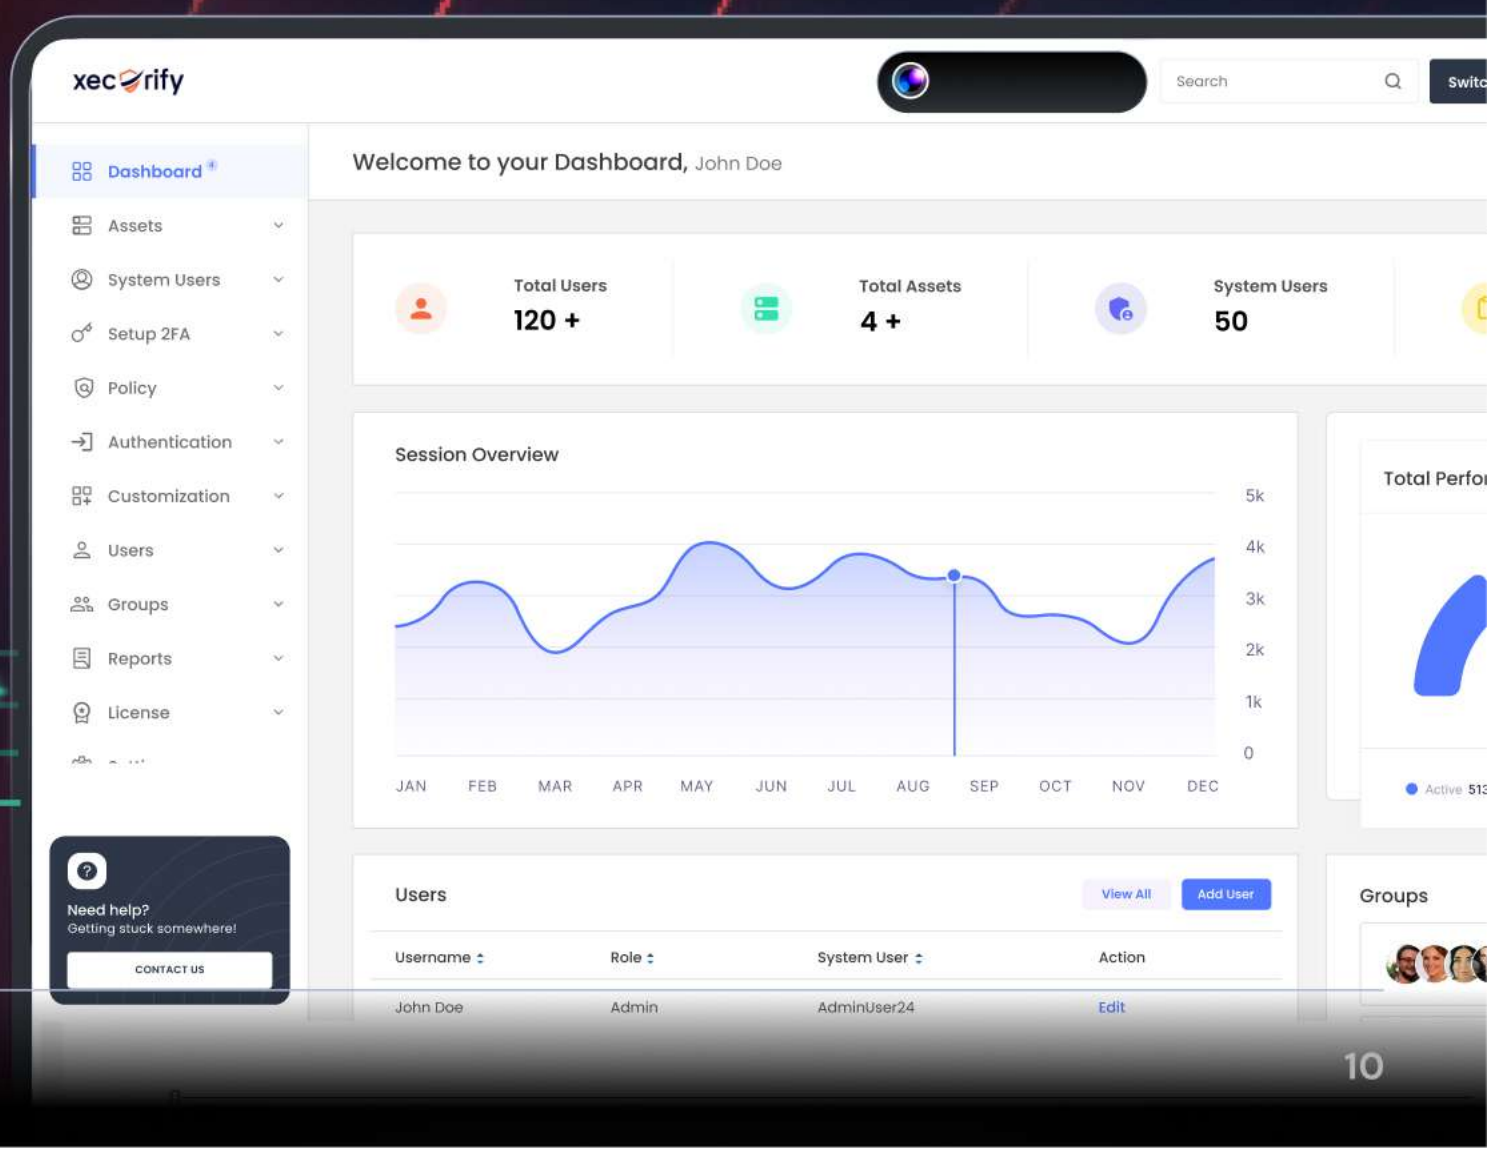
Generate detailed audit logs and reports to fulfill compliance and forensic-related requirements. Gain insights into user actions and improve security posture.

Password Vault & Rotation

Securely store and rotate credentials with an encrypted vault. Automate password updates to eliminate manual errors and improve security.

Resource Access

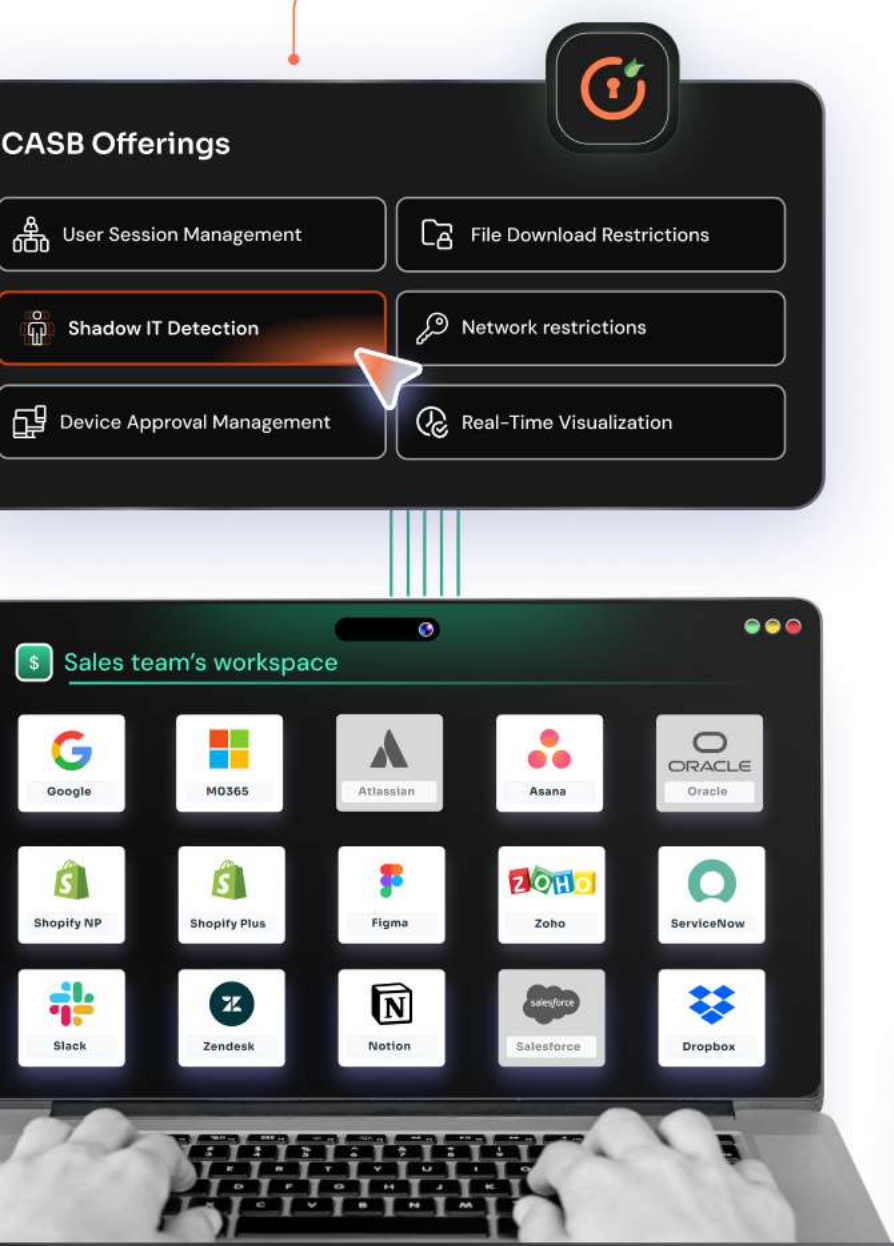
Enable secure access to critical resources via web or thick clients. Ensure seamless connectivity while maintaining robust security measures.



Endpoint Security

(CASB, MDM, DLP)

Shielding business data and managing access control with ease. Prevent data leaks from your Cloud SaaS apps, Endpoints, and Mobile Devices in real-time. Keeping enterprise data safe - anytime, anywhere.



Cloud Access Security Broker (CASB)

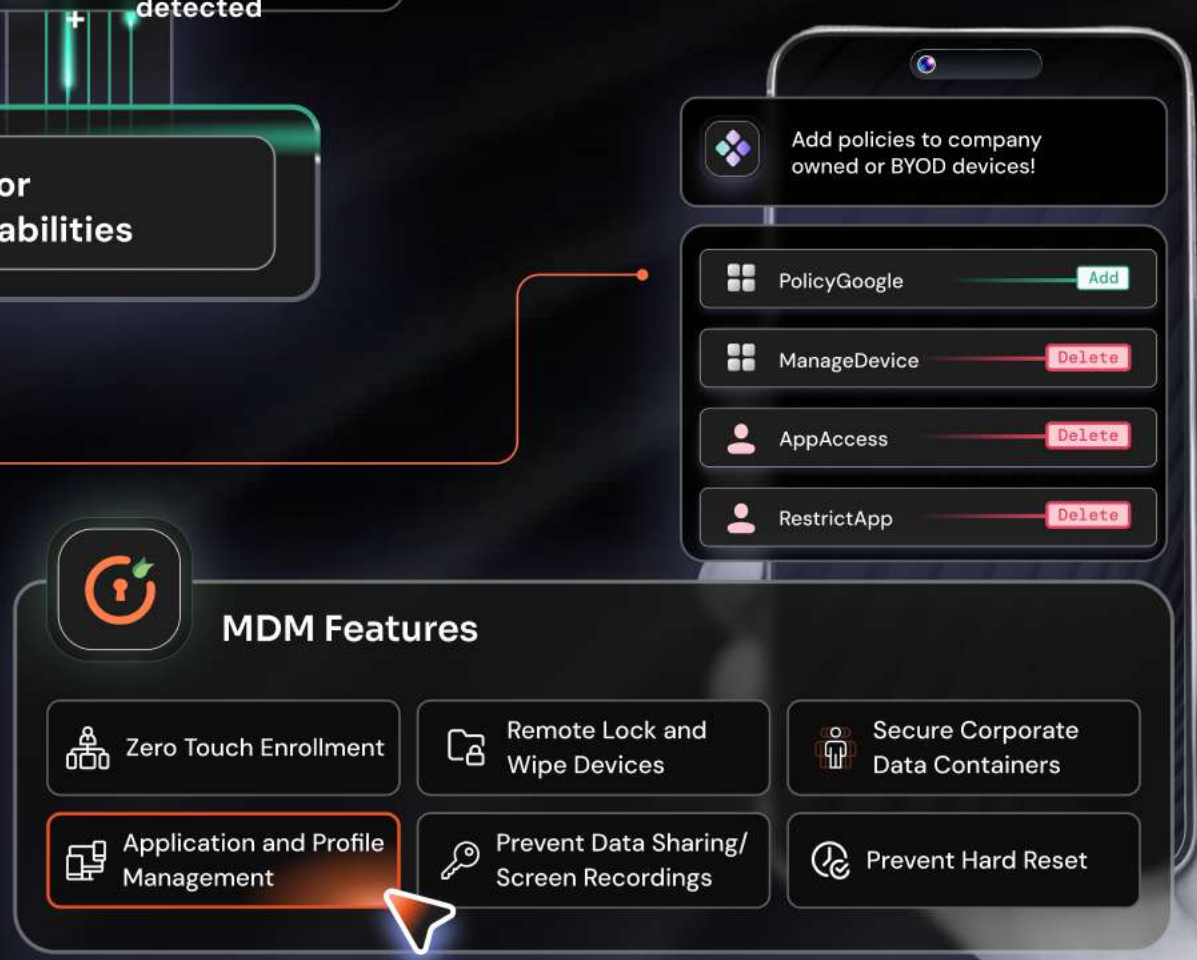
Secure business data on SaaS apps with real-time restrictions, managing device approvals, and data access permissions on the cloud. Set custom policies that meet your security requirements and make you compliance ready!

Data Loss Prevention (DLP)

Prevent costly data leaks by managing the flow of data transfers from your endpoint devices and cloud apps with a DLP solution as your shield.

Mobile Device Management (MDM)

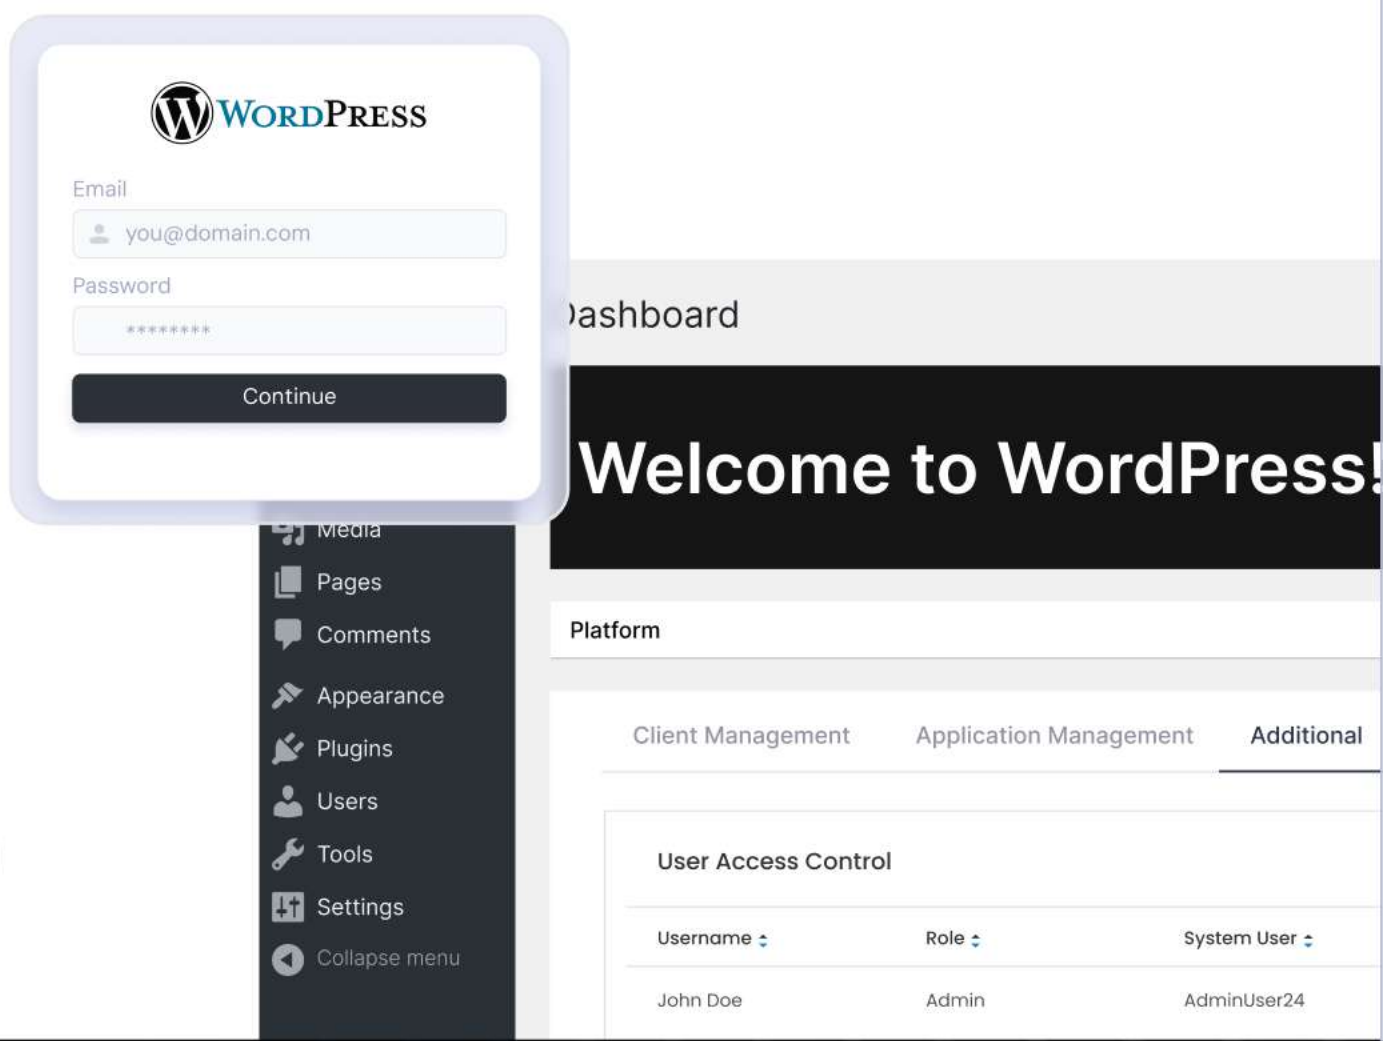
Manage a fleet of your workforce devices—Company-Owned or BYOD! Remotely manage device security policies, app installation, and data wipes in an instant.



Securing WordPress

Secure your WordPress site with our comprehensive suite of advanced security solutions. Additionally, improve user management, simplify operations, and protect your digital ecosystem with efficient integrations and powerful tools.

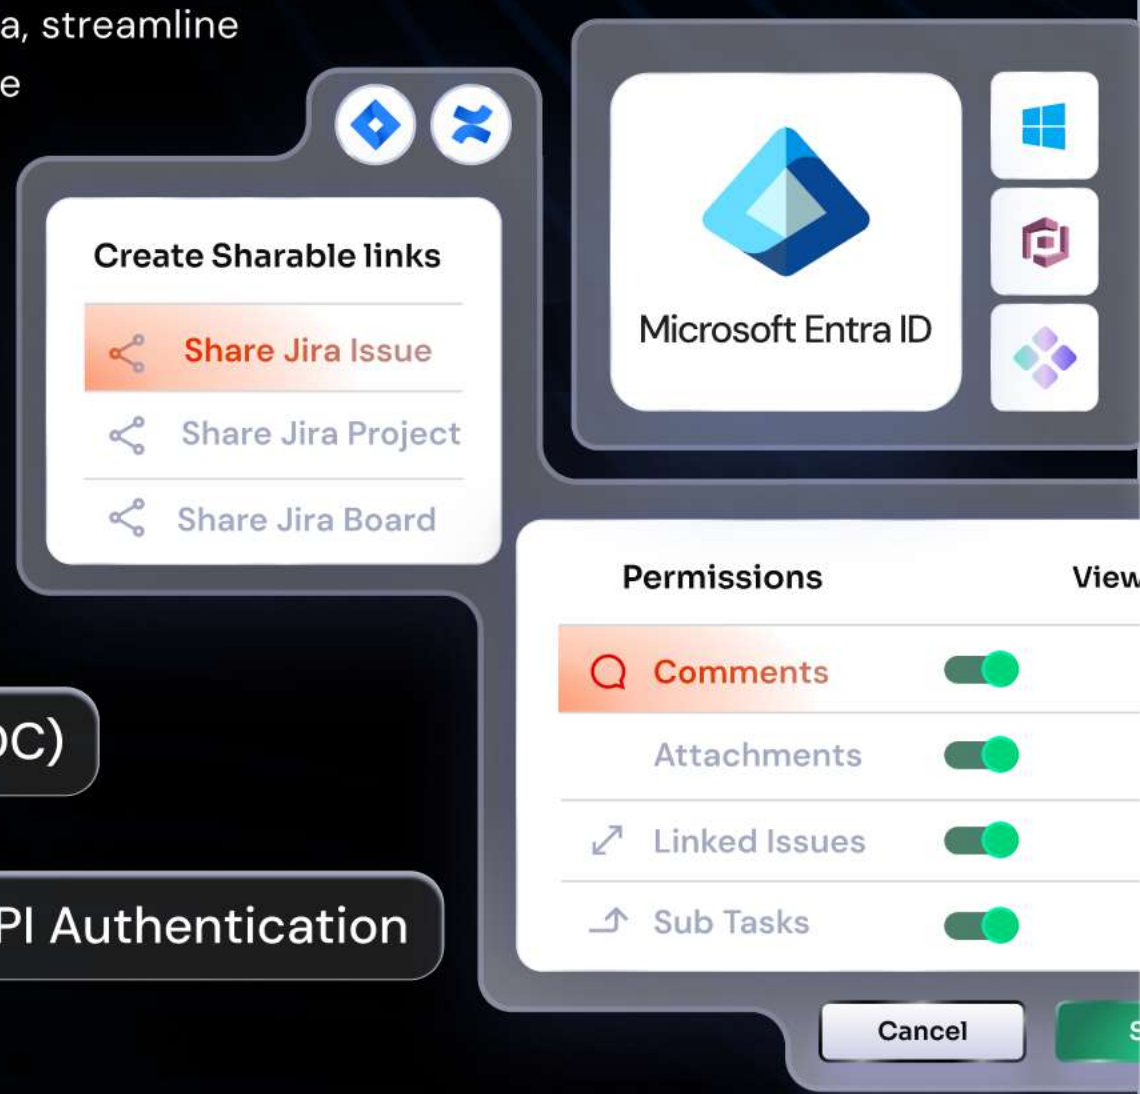
- SSO
- MFA
- Microsoft 365 Integrations
- User Provisioning
- Salesforce ISV
- Web Agency
- API Solutions
- Directory Services (LDAP/AD Integrations Cloud and Intranet)



Securing Atlassian

We deliver a complete suite of solutions to secure your Atlassian ecosystem. From authentication to user provisioning, our apps protect data, streamline workflows, and integrate seamlessly to deliver enterprise-grade performance.

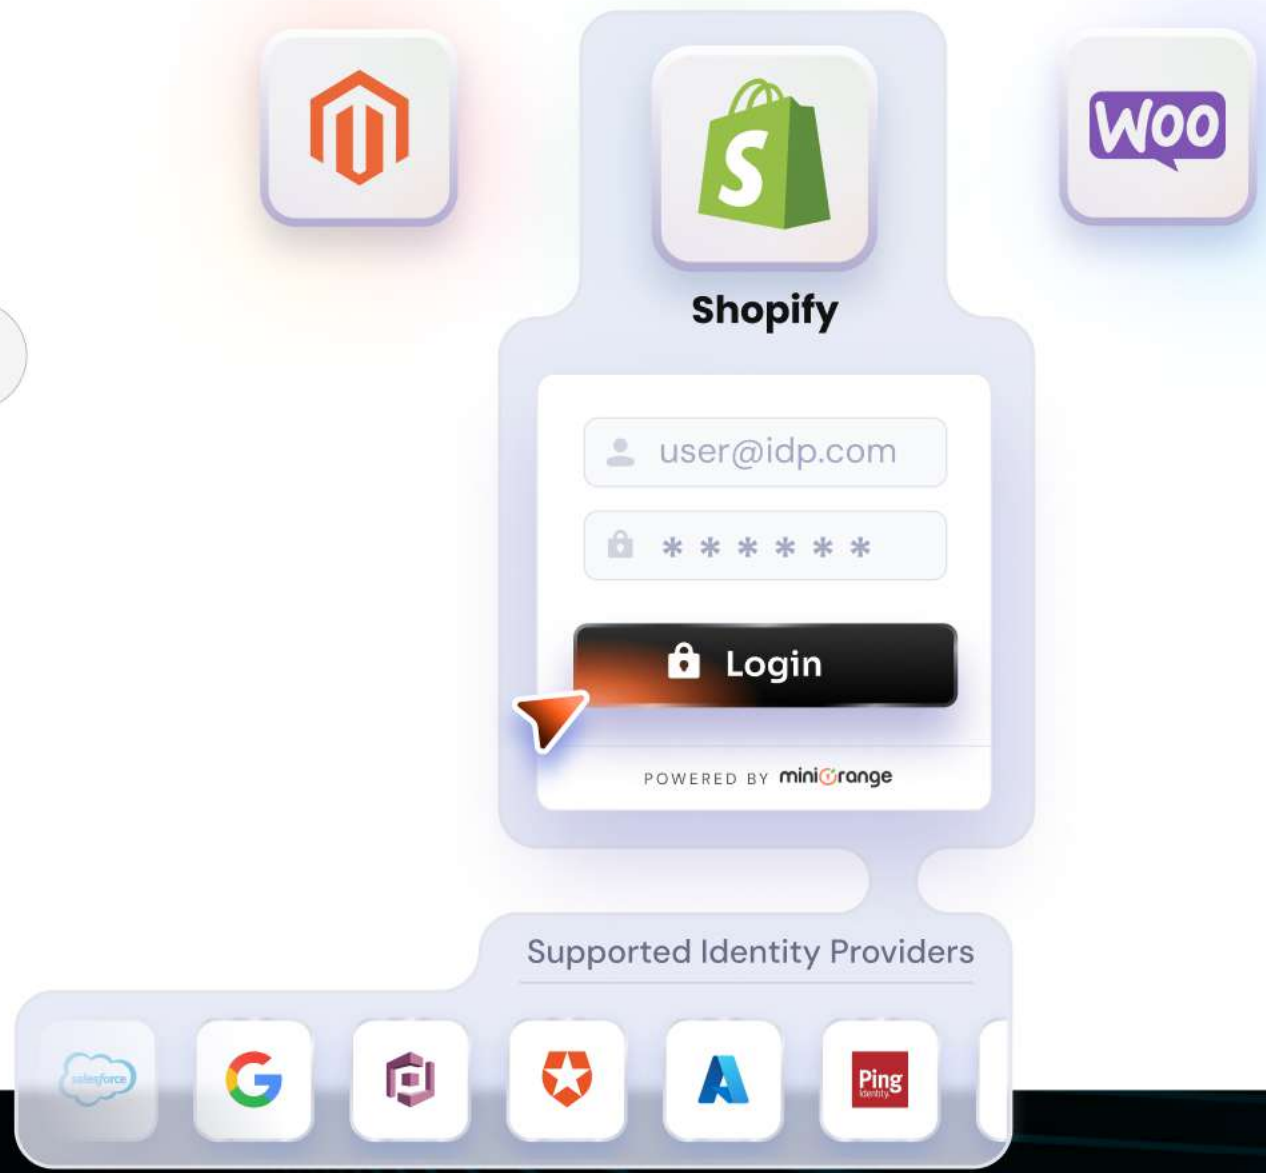
- SSO
- MFA
- SCIM
- Secure Share
- AD Integration
- Application Access andGovernance Workflow (DC)
- Automated User Management
- Enhanced API Authentication



Securing E-commerce

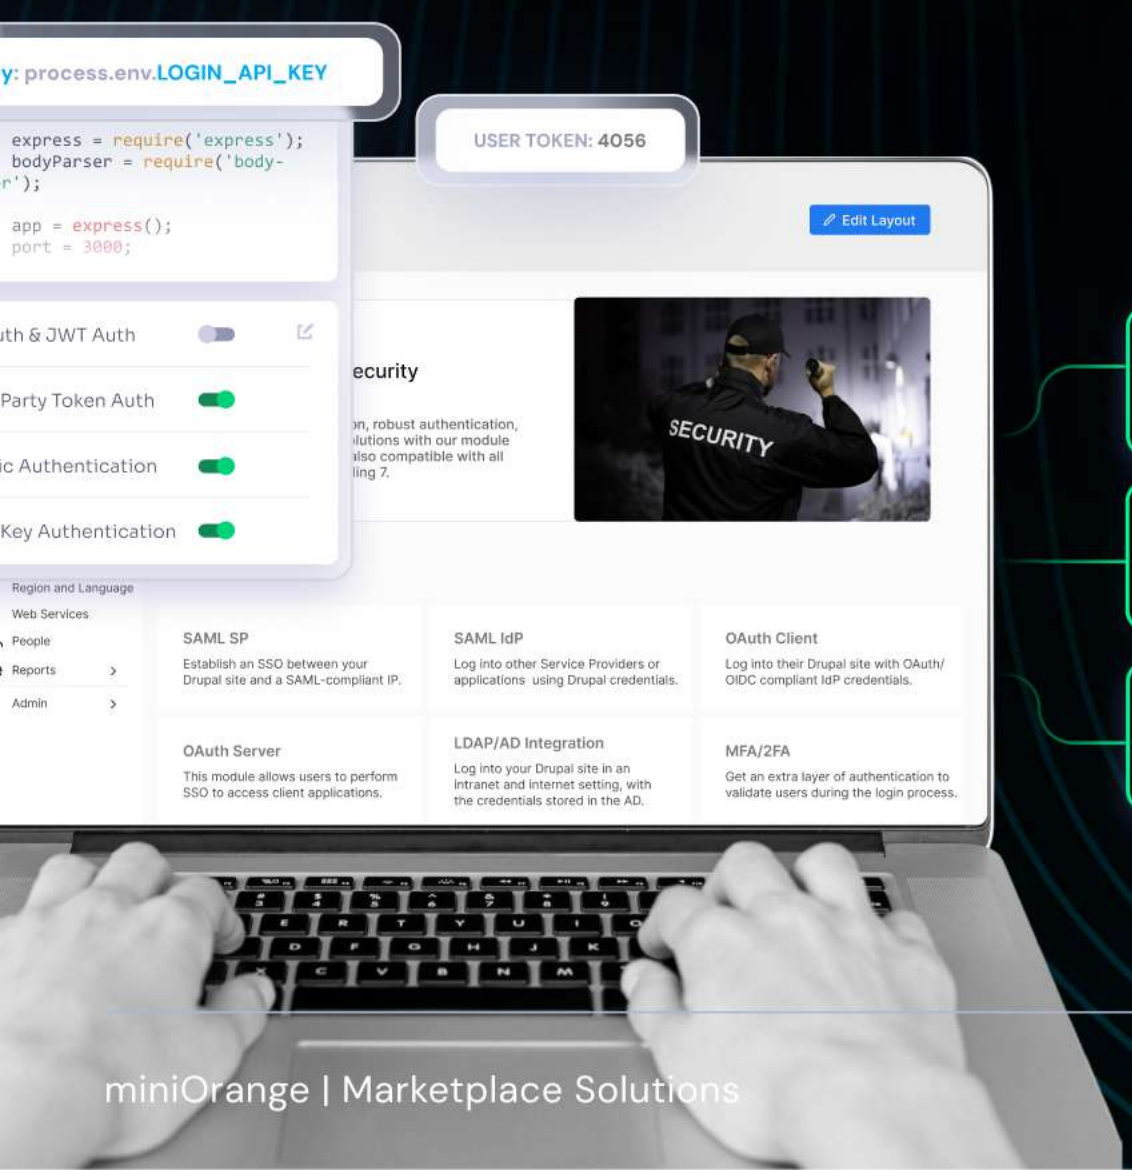
Protect and optimize your E-Commerce store with miniOrange – offering advanced security, automation, provisioning, and loyalty solutions for B2B, B2C, and DTC merchants, ensuring seamless store management.

- SSO
- MFA
- User Provisioning and Inventory Sync
- SMS & WhatsApp Notifications
- Lock store & Secure access
- Headless Store Authentication



Securing Drupal

miniOrange empowers Drupal sites with seamless IAM (Identity and Access Management Solutions), offering robust security, Single Sign-On (SSO), Multi-Factor Authentication (MFA), and user provisioning for enhanced efficiency and protection.



- SSO
- MFA
- Headless Integration
- Session Management
- API Authentication
- User Provisioning and Sync
